SUMMARY

Experienced Front-End Developer with 2 years of expertise in React.js, JavaScript, Redux, HTML5, CSS3, and Material UI. Proven track record in enhancing user experience, optimizing code performance, and managing projects with Jira. Adept at API testing with Postman and proficient in both frontend and backend technologies. Seeking a challenging role to contribute to innovative projects in a dynamic development environment.

SKILLS

Frontend: React.js, JavaScript, TypeScript, Redux, Router DOM, HTML5, CSS3, Material UI, Shadcn

Backend: Node.js, Express.js, MongoDB, Postman, Rest API

Dev Tools: Jira, Bitbucket, Git

PROJECTS

MemonID - React.js, Javascript, Redux, Postman, Material UI

- Enhanced Memon ID social community portal features for improved functionality and user experience
- Resolved numerous bugs through rigorous testing and collaboration, resulting in a 5% increase in app stability
- Implemented and optimized code for a custom calendar component in the Memon ID project, improving its performance and functionality
- Utilized Jira board to plan and track tasks, ensuring a systematic approach to coding

Employee Management System—React.js, Javascript, Redux, Postman

- Created an Employee Management System with React, implementing role-based access control for user privileges
- Designed a user-friendly interface with CRUD operations for effective employee data management
- Integrated a calendar feature for scheduling events and tracking attendance, enhancing organizational efficiency

Coaching Management System—React.js, Javascript, Redux, Postman

- Developed a comprehensive application for student and teacher management, allowing students to enroll, track syllabus completion, and view attendance records
- Implemented functionality for students to add topics and chapters, organized by subject categories, enhancing their learning experience
- Integrated links for accessing lectures and clearing topics, providing additional resources for students
